

To the FCC,

It has come to our attention that the FCC is considering allowing LPFM stations to take priority over current FM translator service. If this were to occur, it could affect service to our favorite radio station, K-LOVE. K-LOVE offers a positive and encouraging alternative to what most stations produce. We have listened to this station for many years. During this time, we have lived in a couple of different states and we have appreciated that we could get reception of this station from all the places we have lived. K-LOVE has an impact both nationally and locally. Many local churches and organizations make announcements about community events and concerts through K-Love. If and LPFM station was given preference over the current FM translator service provided to us by K-LOVE, this would be a real disservice to our community.

Sincerely,
James & Michele Atherton
Lexington, KY
